

Smart Connections Introduction

A BIM Solution for Revit that instantly adds any number of face-specific intelligent details – which adapt to host-element changes – according to predefined rules.

Installing Smart Connections

- Download & install [TOOLS4BIM Dock](#) for your Revit version.
- Start Revit.
- In the TOOLS4BIM Dock, select Smart Connections.

TOOLS4BIM Dock download page

ONE Shortcut to ALL Trials, Tools, Updates, and more...

All AGA CAD developed Autodesk® Revit® add-ons and BIM solutions are accessible in Revit that works like the Project Browser / Properties windows. This tool manager is v activation and usage.

Dock & Tool Installation Instructions

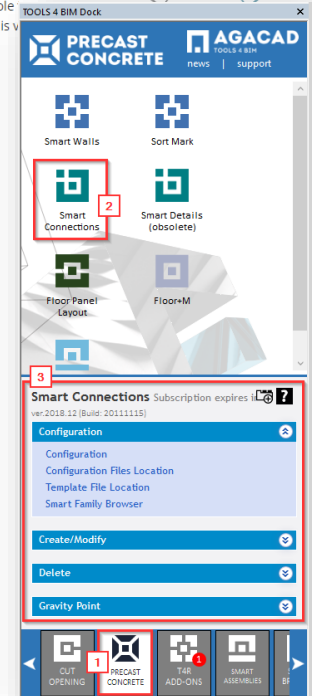

- for Revit® 2019
- for Revit® 2018
- for Revit® 2017

Dock & Tool Installation Instructions (older versions)

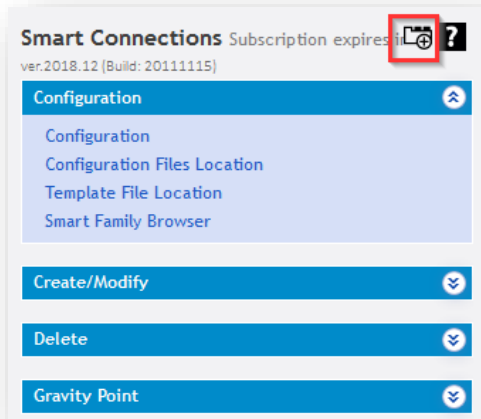

Download TOOLS 4 BIM DOCK

Version 1.0.0.3 Build: November 20, 2018

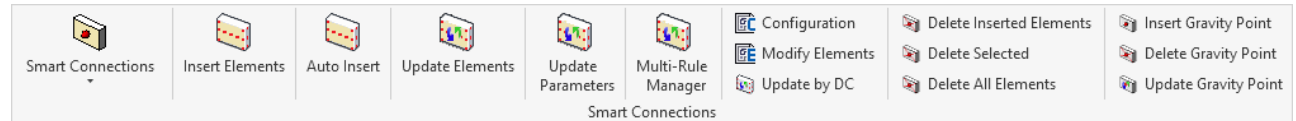

Working with Smart Connections

Smart Connections in Tools 4 BIM Dock

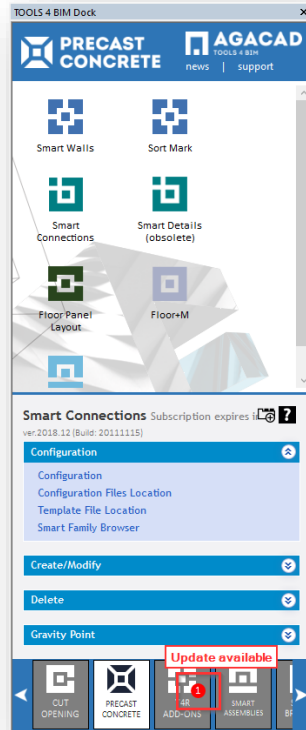

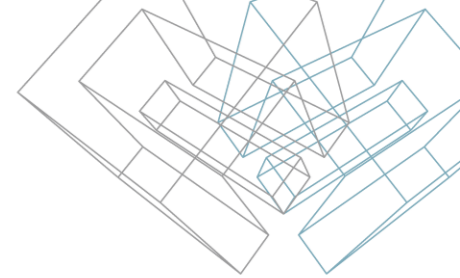

Smart Connections in the T4R Create/Modify ribbon

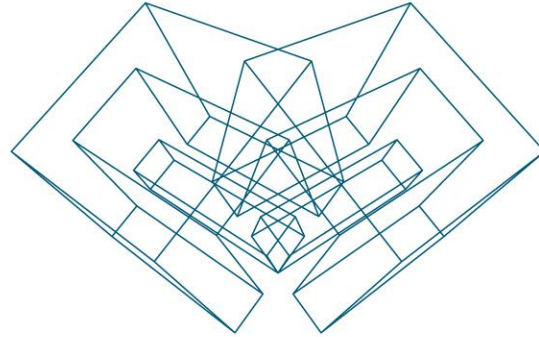

- There are two ways to work with Smart Connections:
 - by using commands from TOOLS4BIM Dock, Tools tab.
 - by using commands from T4R Create/Modify ribbon

Note 1: To turn on Smart Connections in the ribbon, click the icon with ‘+’ sign in the Dock.

Updating Smart Connections

- Several times per year, we release updates and improvements. You will see a red dot notification in the Dock. By clicking it, you can install all available updates.
- That's why we recommend using the Dock version – to always keep up-to-date.
