Truss+
Modify Truss System Grid

Chapter Three
Modify Truss System Grid

- Select a truss system grid.
- Choose *Modify Truss System Grid* directly from “Truss+” menu.
Modify Truss System Grid

- Parameters for defining setback and other valley parameters
Modify Truss System Grid
Modify Truss System Grid

- If Valley Set Grid needs to be inserted, switch Off the Valley *trusses will not be used* check box.
Modify Truss System Grid

- Valley pitch

If there is a lock symbol near the value of parameter, it means that the truss system grid is attached to the roof (after updating grid from the roof, parameters will be updated automatically according to the roof geometry).
Modify Truss System Grid

- Spacing is calculated from the bottom

- Spacing is calculated from the top
Modify Truss System Grid
Modify Truss System Grid

- Cut bottom chord of Valley
- Sheeting thickness: 0.000
